computer-aided design

INDEX

Volume 17 Nos 1-10
January/February — December 1985
ISSN 0010-4485

SUBJECT INDEX

A
A comparison of modes for using CAD 230
Adaptive controllers 9
A hierarchical data structure for representing assemblies: part 1 15
Algorithms 42, 58, 69
Alvey projects 465
Analytical method 311
An application of Bertrand curves and surfaces to CADCAM 348
An efficient graphical method for CAD 369
Apollo Domain 132
A practical approach to software engineering by using an interaction handler and skeleton code generator 374
A practical approach to workstation cost-justification 125
Arbitrary boundaries 60
Architectural design 319
Architectural detailing 428
Architecture 179
Artificial intelligence 319, 465
Artificial intelligence at Edinburgh University 465
Assembly modelling 15
Assessment and optimization of dimensional tolerances 191
A study of placement algorithms through trial interchange of logic modules 210
A supermicro workstation for third generation CAE 130
A three-layer philosophy for the design of CAD software 262
Australian model uniform building code 399
AUTOMAP II 271
Automatic code generation 374
Automatic data collection 137
Automatic layout 25

B
BANG approach 125
Baseband 122
Bernstein-Bezier method 225
Bertrand curves 348
Bibliography of books on artificial intelligence with particular reference to expert systems and knowledge engineering 463

BOOKS AND PUBLICATIONS
Adey, R A and Brebbia, C A Basic computational techniques for engineers 287
Alexandridis, N A Microprocessor system design concepts 242
Anceau, F and Aas, E J (Eds) VLSI 83, VLSI design of digital systems 284
Arnold, Erik Computer-aided design in Europe 105
Baccelli, F and Fayolle, G Modelling and performance evaluation methodology 104
Begg, V Developing expert CAD systems 103
Bertolazzi, P and Luccio, F (Eds) VLSI: algorithms and architectures 104, 285
Bruck, A Computer art and graphics: how to program with personal computers 103
Budde, R, Kuhlenkamp, K, Mathiassen, L and Zullighoven, H (Eds) Approaches to prototyping 240
Chytil, M P and Koubek, V Mathematical foundations of computer science 287
Computer Graphics Tokyo '84 Proceedings 287
Corke, D K A guide to CAPM 385
Danthine, A and Geradin, M (Eds) Advanced software in robotics 103
Davies, B J (Ed) Design engineering (DES83) 106
Dillman, R and Rembold, U (Eds) Methods and tools for computer integrated manufacturing 103
Doumeingts, G Advances in production management systems 103
Dromey, R G How to solve it by computer 240
Dvorak, S and Musset, A Basic in action 240
Fu, K S (Ed) VLSI for pattern recognition and image processing 103, 238
Gardan, Y and Lucas, Michel Interactive graphics in CAD 284
Gehani, N C: an advanced introduction 284
Gomersall, A and Farmer, P Robotics: the international bibliography with abstracts 287
Harris Chapman, D and Hall Computer graphics and applications 240
Hartley, J FMS at work 103
Haug, E J (Ed) Computer aided analysis and optimization of mechanical system dynamics 201
Hayward, Stan Computers for Animation 105
Hicks, P J (Ed) Semi-custom IC design and VLSI 106
Hopgood, F R A, Duce, D A, Gallop, J R and Sutcliffe, D C Introduction to the graphical kernel system GKS 105
Horowitz, Ellis (Ed) Programming languages: a grand tour 285
Hubbard, Stuart W The computer graphics glossary 201
IEE Conference Publication Number 232 European Conference on Electronic Design Automation (EDA84) 384
IProdE Working Party, The IPE A guide to design for production 201
Japanese factory automation 335
Kaelble, D H Computer-aided design of polymers and composites 287
Kochan, D Integration of CAD/CAM 47
Maier, David The theory of relational databases 47
Martinez, M R and Leu, M C (Eds) Computer integrated manufacturing 238
Michie, D and Johnston, R The creative computer 384
Myers, R E Microcomputer graphics for the IBM PC 242, 334
Mylroi, M G and Calvert, G (Eds) Measurement and instrumentation for control 240
Plander, I (Ed) Artificial intelligence and information-control systems of robots 287
Port, S Computer-aided design for construction 238
Preston, E J, Crawford, G W and Coticchia, M E CAD/CAM systems 286
Radford, J C The engineer and society 240
Schmidt, J W and Brodie, M L (Eds) Relational database systems: analysis and comparison 286
Seiffert, U and Walzer, P The future for automotive technology 242
Shostak, R E 7th International conference on automated deduction 240
Stover, R An analysis of CADCAM applications 334
Thayse, A P-functions and Boolean matrix factorization 287
Tufte, Edward R The visual display of quantitative information 334
Ullman, J D Computational aspects of VLSI 287
Vehicle structures 104
Vince, J Dictionary of computer graphics 47
Wood, D Paradigms and programming with Pascal 242

Boundaries 142
Broadband 122
B-spline curves 58
Building services 179

C
CAD 191
CAD company caters for the electronics industry 266
CAD facility 278
CAD for the electronics industry 266
CADMAT tools 137
CAD system helps to win award for consultants 278
CAD tools 300
CAD training 329

CAE Centre 379
CAE Centre – a way of linking university to industry 379
CAMX 149
CAMX at Otter Controls 149
CAPP 162
Channel routing 25
Chip design 266
Chipsmith 130
CIM 137
Circuit modelling 353
Classification of edges and its application in determining visibility 30
Compatibility 117
Compensation method 300
Computational geometry 58
Computational time 210
Computer aid 83
Computer-aided control of electrical supply operations 273
Computer-aided design of equivalent circuit models for microwave frequencies 353
Computer-aided discretization of continuous data control systems 169
Computer aided drafting and documentation 25
Computer-aided geometric designs 58
Computer-aided molecular design 215
Computer-aided retrieval 278
Computer-designer relationship 83
Computer-generated multi-row schematics 25

Computerized steam path design in turbomachinery 363
Computers are putting Australia on the map 271

CONFERENCE REPORTS
Effective CADCAM Conference 332
IEE Computing and Control Division Colloquium on Robot Control in Practice 153
NE 85 245
National Engineering Laboratory open days 332
Seminar on financial planning for CADCAM and CAE installations 243
22nd Design Automation Conference 386

Continuous data control 169
Contour integrals 60
Contour integration on the graphics screen and its application in CADCAM 60
Convex hull property 367
Costing 3
Cost-justification 125
Cubic curves 367
Cubic splines 348
Current issues in training for CAD 329
Curve and surface design 225
Cusps 77
Cutting tool 162

D
Damage assessment 410
Database 15
Data reduction algorithm 257
Data structure 15
Design assistant 319
Design automation 25
Design check 83
Design codes 399
Design codes as expert systems 399
Design databases 443
Design grammars 428
Design philosophy 262
Design verification 137
Design verification essential for CADMAT/CIM implementation 137
Diagram dressing 273
Digital differential analyser 348
Digitizers 271
Discretization 169
Distance learning packages 329
Distributed computing 122
Dynamic compensation method for discrete systems 300

E
Edge and face classification 30
Education in CAE 379
Elementary machined surfaces 162
Element value optimization 353
Energy 179
Engineering software 132
Evaluation 3, 60
Expert systems 399, 410, 420, 436, 443, 455

F
Failure handling 436
Failure handling in a design expert system 436
Finite element analysis using a single user computer 142
Fortran 60
Four bar mechanism analysis 369

G
Geometric modelling 69
Generative expert systems 428
GKS 42
GPSL 219
GPSS 219
Graph-based algorithms 25
Graphical methods 369
Graphics 37

H
Hardware and software compatibility of computer-aided engineering workstations 117
Hidden-line algorithm 30
Hidden surface removal 37
HI-RISE and beyond: directions for expert systems in design 420

I
Identifying and quantifying the company-wide benefits of CAD within the structure of a comprehensive investment program 3
Induction 455
Industrial training 329
Industrial liaison centre 379
Inference of the positions of components in an assembly: part 2 20
Installation and use of the Apollo network at Oxford Polytechnic 132
Integrated CAD development for building services engineering 179
Integrated CAD systems 443
Integrated computer systems system 278
Integrating member selection and structural appraisal in the design of steelwork 83
Interfaces 443
Interfacing expert systems with design databases in integrated CAD systems 443
Intersection 311
Intersection algorithm 77
Interview techniques 455
Introducing CAD 3
Introducing GPSL: a flexible manufacturing simulator 219
Isentropic process 363
Isobaric process 363

K
Knowledge elicitation 455
Knowledge elicitation: issues and methods 455

L
Linear 230
Linear approximation 257
Linear approximation of curves with bounded curvature and a data reduction algorithm 257
Local area network 122
Logic diagrams 25
Logic modules 210

M
Man-machine interaction 230
Man-machine interface 115
Mapping 271
Marketplace trends as growth tops 50 per cent 94
Meshing 142
Methods used for intersecting geometrical entities in the GPM module for volume geometry 311
Modified adaptive controllers for improving the transients in adaptive control 9
Modular 230
Molecular graphics 215
Molecular structure 215
Multi-row schematics 25

N
NC machine tool path generation 69
Network 132
Numerical method 311

O
Offset curves 77
Offset curves in the plane 77
Optimal 230
Optimization 9, 191

P
PCB design 266
Placement 25
Placement technique 210
Plane face illustration 30
Points of intersection 369
Poisson equation 142
Postprocessing 142
Probabilistic methods 191
Product development process 149
Prolog 399
Protocol analysis 455

R
Racal-Redac 266
Raster-based graphics 42
Realtime processing 257
Recursion 225
Recursive algorithms for the representation of parametric curves and surfaces 225
Redefining the role of computers in architecture: from drafting/modelling tools to knowledge-based design assistants 319
Redesign strategies 436
Repertory grid technique 455
Resource flexibility 219
Robots 219

S
Safety evaluation 410
Sampling period 300
Search 319
Self-intersection points 77
Semicustom integrated circuits 130
Shading evaluation 305
Shading evaluations with general three-dimensional models 305
Silicon compilation 130
Simple processing cycle 162
SIMULA 219
Simulation 230
Single user computer 142
Software tool 374
Solid modelling 311
Solution states 319
Space-filling curves 37
Spatial relationships 20
Special cases 311
Steam path design optimization algorithm 363
STOPP: an approach to CADCAM integration 162
Structural design 410, 420
Structural engineering applications of expert systems 410
Surface display algorithms 37
Synthesis 215

T
Table-driven algorithms for generating space-filling curves 37
Technical note: cubic curves 367
Technical note: Raster applications with GKS 42
Telecontrol 273
The engineering workstation: some thoughts on its future form 115
The insertion algorithm 58
3D models 305
Three-layer access 262
Time domain optimization 169
Tolerances 191, 311
Towards generative expert systems for architectural detailing 428

Transformation matrices 20
Transients 9
Trial interchanges 210
True solid modelling 149

U
User interaction 179
Using a local area network 122

W
Wall diagram 273
Workstation 117, 130
Workstation characteristics 125
Workstation features 115
Work-time analysis 125

AUTHOR INDEX

A
Aish, Robert, Van Vuren, Johannes and Walmsley, Mojgan Integrated CAD development for building services engineering 179
Al-Assadi, Salem A K see Marouf, Assam A
Andrews, Guy see Lee, Kunwoo
Arthur, P F The engineering workstation: some thoughts on its future form 115

B
Ballam, Anthea CAD system helps to win award for consultants 278
Barash, M M see Choi, B K
Bez, H E Technical note: cubic curves 367
Bird, Malcolm and Schofield, Norman A practical approach to software engineering by using an interaction handler and skeleton code generator 374
Bobrow, James E NC machine tool path generation from CSG part representations 69
Boehm, Wolfgang and Prautzsch, Hartmut The insertion algorithm 58
Brown, David C Failure handling in a design expert system 436
Brown, Marlene Marketplace trends as growth tops 50 per cent 94
Brown, R see Winstanley, J V

C
Carter, A W H see Winstanley, J V
Choi, B K and Barash, M M STOPP: an approach to CADCAM integration 162
Clasper, R N see Marshall, John
Clements, R R A three-layer philosophy for the design of CAD software 262
Colyer, B and Trowbridge, C W Finite element analysis using a single user computer 142
Cowan, David Artificial intelligence at Edinburgh University 465
Cowan, David F CAE Centre – a way of linking university to industry 379
Cowan, David F CAD company caters for the electronics industry 266
Crampin, M, Guifo Guifo, R and Read, G A Linear approximation of curves with bounded curvature and a data reduction algorithm 257
Creamer, G D see Primrose, P L

D
Dimarogonas, Andrew D Computerized steam path design in turbomachinery 363
Dowson, Monica Computer-aided design of equivalent circuit models for microwave frequencies 353

E
Eglin, David A supermicro workstation for third generation CAE 130

F
Fabrikant, V I and Sankar, T S An efficient graphical method for CAD 369
Fabrikant, V I, Latinovic, V, and Sankar, T S Contour integration on the graphics screen and its application in CADCAM 60
Furuta, Hitoshi, Tu, King-Sun and Yao, James T P Structural engineering applications of expert systems 410

G
Gee, Kirk Using a local area network 122
Gero, John S Bibliography of books on artificial intelligence with particular reference to expert systems and knowledge engineering 463
Gero, John S see Radford, A D
Gero, John S see Rosenman, M A
Gossard, David C see Lee, Kunwoo
Griffiths, J G Table-driven algorithms for generating space-filling curves 37
Guifo Guifo, R see Crampin, M

H
Hart, Anna Knowledge elicitation: issues and methods 455
Hoschek, Josef Offset curves in the plane 77
Howard, H Craig see Rehak, Daniel R

I
Inglis, S, Medland, A J and Carnall, C A A comparison of modes for using CAD 230

K
Kalay, Yehuda E Redefining the role of computers in architecture: from drafting/modelling tools to knowledge-based design assistants 319
Kripac, Jiri Classification of edges and its application in determining visibility 30
Kiritsis, Dimitris see Papaioannou, Spiros, G

L
Latinovic, V see Fabrikant, V I
Lee, Kunwoo and Andrews, Guy Inference of the positions of components in an assembly: part 2 20
Lee, Kunwoo and Gossard, David C A hierarchical data structure for representing assemblies: part 1 15
Leonard, R see Primrose, P L

M
Maher, Mary Lou HI-RISE and beyond: directions for expert systems in design 420
Marouf, Azzam A and Al-Assadi, Salem A K Computer-aided discretization of continuous data control systems 169
Marshall, John and Clasper, R N Computer-aided control of electrical supply operations 273
May, Michael Computer-generated multi-row schematics 25
McLeod, N D Computers are putting Australia on the map 271
McPhater, N S and Strachan, C Hardware and software compatibility of computer-aided engineering workstations 117
Medland, A J see Inglis, S
Mejtsky, G and Rahnejat, H Introducing GPSL: a flexible manufacturing simulator 219
Middleditch, A E see Sears, Ken H

N
Nandy, Soumitra K and Patnaik, L M A study of placement algorithms through trial interchange of logic modules 210
Norrie, John Current issues in training for CAD 329

O
O'Neill, R A CAMX at Otter Controls 149

P
Papaioannou, Spiros G and Kiritsis, Dimitris An application of Bertrand curves and surfaces to CADCAM 348
Parkinson, D B Assessment and optimization of dimensional tolerances 191
Patnaik, L M see Nandy, Soumitra K
Paz, M B see de la Sen, M
Peckham, R J Shading evaluations with general three-dimensional models 305
Pfeifer, Hans-Ulrich Methods used for intersecting geometrical entities in the GPM module for volume geometry 311
Piegl, L Recursive algorithms for the representation of parametric curves and surfaces 225
Prautzsch, Hartmut see Boehm, Wolfgang
Primrose, P L, Creamer, G D and Leonard, R Identifying and quantifying the company-wide benefits of CAD within the structure of a comprehensive investment program 3

R
Radford, A D and Gero, John S Towards generative expert systems for architectural detailing 428
Rahnejat, H see Mejtsky, G
Read, G A see Crampin, M
Rehak, Daniel R and Howard, H Craig Interfacing expert systems with design databases in integrated CAD systems 443
Richards, W Graham Computer-aided molecular design 215
Rosenman, M A and Gero, John S Design codes as expert systems 399

S
Sankar, T S see Fabrikant, V I
Schofield, Norman see Bird, Malcolm
Sears, Ken H and Middleditch, Alan E Technical note: Raster applications with GKS 42
de la Sen, M Modified adaptive controllers for improving the transients in adaptive control 9
de la Sen, M and Paz, M B Dynamic compensation method for discrete systems 300
Strachan, C see McPhater, N S
Surtees, J O see Toms, P

T
Thornton-Bryar, Ian C M A practical approach to workstation cost-justification 125
Toms, P and Surtees, J O Integrating member selection and structural appraisal in the design of steelwork 83
Trowbridge, C W see Colyer, B
Tu, King-Sun see Furuta, Hitoshi

V
Van Vuren, Johannes see Aish, Robert

W
Walmsley, Mojgan see Aish, Robert
Warren, Stephen F S Installation and use of the Apollo network at Oxford Polytechnic 132
Winstanley, J V, Carter, A W H and Brown, R Design of verification essential for CADMAT/CIM implementation 137

Y
Yao, James T P see Furuta, Hitoshi
